

INFS 330 Test Assignment

Due Monday March 7 2022

Individual work expected. You must not consult with your colleagues for this assignment.

Lean N Green (LNG) is a new company made up of medical professionals who are interested in incorporating food as medicine. They are plant based whole foods enthusiasts.

The owners want you to set up a landing page for their proposed business. They have provided a sample wireframe for what the page layout might look like. The page will include a text, images, slideshow, interactivity

Prepare a landing page for LNG using HTML, css, and bootstrap 5

You may use their layout design or create your own. However, the page must include at least the following:

Minimum requirements

- At least 3 rows and 3 columns
- All the rows/columns must not be of the same size. Include spanning, overlapping and/or nesting
- Background color and/or image
- Decorated text
- Table
- Navigation bar, vertical or horizontal, with at least 4 links to active external sites (test the links)
- Slideshow with at least 5 images. Automatic as well as user control possible
- User interaction (besides slideshow and links) that includes transformation, transition, show/hide, etc.

Use bootstrap and add your own css if necessary (do not modify bootstrap code)

Good graphics (use your own, or stock e.g. unsplash.com) assign credit as suggested by the owners

Your entire page should be neatly arranged. Using colors. Fonts, borders, etc. tastefully.

You may use lorem ipsum fillers, however, you should have at least one area with actual text content about LNG

Save images and css in separate folders

Zip your folder with all contents and upload to LearningHub

Sample Layout
